The 3 types of Machine Learning you should know

ARTIFICIAL INTELLIGENCE · MACHINE LEARNING · DEEP LEARNING

The 3 types of Machine Learning you should know.

SWIPE ->

1 Supervised learning - labelled data, learn input output mapping. Spam filters, price prediction, image classification.

2 Unsupervised learning - no labels, find hidden structure. Customer segmentation, anomaly detection, dimensionality reduction.

3 Reinforcement learning - an agent learns by trial, error and reward. Game playing, robotics, recommendation policies.

Most production systems today are supervised. The most viral demos are reinforcement learning.

Where would you place your current project?
