Want to get into AI/ML? Here's a 6-step roadmap

ARTIFICIAL INTELLIGENCE · MACHINE LEARNING · DEEP LEARNING

Want to get into AI/ML? Here's a 6-step roadmap.

SWIPE ->

1. Python - syntax, data structures, virtual environments

2. Math foundations - linear algebra, probability, calculus (just enough)

3. Core ML - scikit-learn, train/test split, metrics, overfitting

4. Deep learning - PyTorch, a small neural net from scratch

5. Domain project - pick a real dataset, ship a working model

6. Portfolio - notebooks, a deployed demo, clear write-ups

Skip the tutorial treadmill. One finished project teaches more than ten started courses.

Save this for your next study session.
