Actively Looking for PhD Opportunities Abroad in AI & ML

Actively Looking for PhD Opportunities Abroad in AI & ML

ARTIFICIAL INTELLIGENCE · MACHINE LEARNING · DEEP LEARNING

SWIPE ->

I'm actively looking for funded PhD opportunities abroad in AI, Machine Learning and Computer Vision.

My focus is on representation learning, self-supervised learning and building efficient vision systems.

A bit about my background:

- Two research papers on CNN-based architectures and JEPA (Joint Embedding Predictive Architecture) models
- Hands-on experience designing, training and evaluating deep learning models from scratch
- Strong interest in world models, efficient architectures and bridging theory with practical implementations
- Comfortable with PyTorch, experimentation and reproducing research ideas

I'm open to positions in labs working on self-supervised learning, vision foundation models or model-based learning.

If you know of any funded PhD openings, have a lab recommendation or can refer me, I'd be incredibly grateful for a DM.
